DEVELOPMENT TOOLS Ruby, HTML5, CSS3, Javascript, AngularJS, ReactJS, Bootstrap, Foundation, Nokogiri, Bourbon, ERB, Sass Rspec, Capybara, Jasmine **TESTING SUITES** FRAMEWORKS Rails, Sinatra Git, Heroku REPOSITORIES PROJECTS Internal Management Site This is an internal site with the ability to manage products on our main website. The import tool accepts jsons and converts them to easily readable text in order for the products to be mapped into their respective datafields. Tech: Ruby on Rails, AngularJS, Javascript, HTML, CSS, AJAX, JSON, Jquery Lynt External sales site built to allow textile manufacturers to sell extra product. We built this site from scratch using a user-story as our guideline. I was involved in every step of the process from tech decisions, coding, styling, and refactoring. The site is built using heavy AngularJS for speed and readability. Bourbon was used as our style guide and site structure. The site is the currently private and only on localhost. Tech: AngularJS, Ruby, Rails, HTML5, CSS3, OO Javascript, Ajax, JSON, Bourbon, Bootstrap Browsin' I worked on this site for my 8 day final project at DBC. The app is designed for an audience that has multiple premium media services. For now, the sites we include are HBO Go, Hulu+, and Netflix. The app allows you to search through all of the content that is available to you based on your subscriptions to make your search for something to watch quick and painless. The goal of our app is to have you in and out so you can search less, and watch more. Tech: ReactJS, OO JS, Ruby, Rails, AJAX, Jquery, Bootstrap, HTML5, CSS3. **EDUCATION**

- 2014 Dev Bootcamp Full Stack Development
- 2010 Yeshiva University BA Marketing/ Managment
